**Home for Sailor's Widows.**  
Andrew Gibson, a ship owner of Liverpool, will build and endow a home for widows of seafaring men.

**Substitute Cod Liver Oil.**  
Genuine cod liver oil has been very scarce during the last year or two, as much shark and other fish oil is sold under that name.

**Care for School Children.**  
In the schools of Rhenish Prussia a chain of stockings and shoes is provided for the use in school of children who arrive with wet feet.

**Cost of Hauling Freight.**  
The cost of hauling a ton of freight a mile on Great Britain's greatest railroads is 1.15 cents; on the Pennsylvania, 40 cents, and on the New York Central, 11 cents.

**Mahogany From Africa.**  
The United States imported from Africa within a year \$1,327,000 of mahogany. This 14,000 tons of freight, in the absence of a direct line, was shipped via Liverpool.

**Shock Was Too Much.**  
Recently an old woman at Clinchy, France, was told that she had won \$20,000 in a Spanish lottery. Later she found she had been hoodwinked and the shock of the disappointment killed her instantly.

**Have Faith in Garlic.**  
Garlic is still used in Wales as a medicine. It is supposed to be good for consumption, gravel, hysteria and other diseases. The belief in its efficacy is a survival from ancient Druid times, when the priests were also physicians.

**European Railway Murders.**

The arrangement of European rail way cars is still responsible for many accidents and murders. One of the latest cases is the murder of an Italian drunkard on a train from Milan to Genoa. The assassin escaped with his victim's purse containing \$7,000.

**"An Unknown Country."**

In a love story told by a little girl of five years to her dolls was overheard this evidence of keen observation: "The man was handsome and about thirty." The woman was very pretty, but was fat. Anybody could tell how old that man was, but how long that woman had been here was an unknown country."

**Vegetable Growing in This Country.**  
Market gardening seems to have increased about 100 per cent in the North and fully 200 per cent in the South during the ten years preceding the last census. The year before the census there were 5,750,000 acres planted in vegetables which had a total value of nearly \$240,000,000.—Country Life in America.

### Work for Warriors.

It is suggested that Columbia might turn her restless activities to account by digging the big ditch herself, but the proposition is open to the objection that she would be certain to have resolution every pay day. Still that obstacle might be overcome in the usual South American way by not having any pay days.

### City of Notions.

Boston, Mass., is called the City of Notions from the number of notions manufactured there. This was first called the Hub of the Universe by Oliver Wendell Holmes, who, as you know, the hub of the world moved around that city. It is also called the Tri-Mountain City, from the three hills upon which it is originally built.

**Wonderful Church Columns.**  
The original contract for the Church of St. John the Divine in New York required that the columns each be made in one solid piece, thirty-five feet long and six feet in diameter. Two of them were broken in making, however, and the owners paid the contractor allowing him to make them in two pieces. The other two were made in one piece.

### Must Be Vaccinated.

In Norway and Sweden before a couple can be legally married they must be vaccinated, and accordingly before the nuptial rites are performed it is the duty of the minister to inspect the vaccination certificates of both bride and bridegroom. Vaccination and love-making are closely connected in Brazil. There parents and guardians, before giving their consent to the marriage of their charges, demand a certificate from a medical man, testifying that the would-be bride or bridegroom has been vaccinated.

## Try for Health

229 South Peoria St.,  
Chicago, Ill., Oct. 7, 1902.

Eight months ago I was so ill that I was compelled to lie or sit down nearly all the time. My stomach was so weak and upset that I could keep nothing on it and I vomited frequently. I could not urinate without great pain and I coughed so much that my throat and lungs were raw and sore. The doctors pronounced it Bright's disease and others said it was consumption. It mattered little to me what they called it and I had no desire to live. A sister visited me from St. Louis and asked me if I had ever tried Wine of Cardui. I told her I had not and she bought a bottle. I believe that it saved my life. I believe many women could save much suffering if they but knew of its value.

*Serge Danner*

Don't you want freedom from pain? Take Wine of Cardui and make one supreme effort to be well. You do not need to be a weak, helpless sufferer. You can have a woman's health and do a woman's work in life. Why not secure a bottle of Wine of Cardui from your druggist today?

### West Indian Bayberries.

The Indians believe that their bayberries help about in the air all the time almost as if they were as much as they like, and it doesn't matter how dirty they get. Consequently they are the happiest babies in the world.

### Cheap Ozone.

An English engineer named Mr. Worthy, now living in Stuttgart, claims to have invented an apparatus for providing an abundant and cheap supply of ozone, which will prove of great use in hospitals, theaters and other buildings.
